

Midmark and Ritter Exam Room Casework

Casework combines utility and beauty giving the contemporary style you want and the function you need. The durable cabinets and mobile carts offer different configurations to maximize storage and space in your exam room or facility. Choose from four styles: Basic, Best Value, Managed Care and Traditional Exam Room Casework.

Midmark Modular Casework

Economically designed to look great, and be durable and flexible enough to withstand daily abuse and repeated cleanings. The casework's non-porous steel construction avoids the sagging, warping and rough edges. Seamless drawers made of durable polystyrene contain spills and are easy to clean. Also features quality ball bearing glides, and clear snap-on drawer pulls. Choose from a variety of standard colors to complement your other Midmark exam tables, physicians' seating, sterilizers, surgical table and lights.

Ritter Modular Casework

Ritter understands the needs of healthcare professionals. Their products are not only durable, but flexible in design, to meet your specific needs at an affordable price. Warped doors and drawers with nicks and scratches appear unsanitary and create a negative image of your practice. When you choose Ritter Modular Casework, you can be assured you've invested in quality casework... designed specifically for your medical facility. Features such as seamless polymer covered fronts resist spilled fluids and chemicals and can be cleaned without surface degradation. Polymer-covered drawers with side mounted epoxy slides, rated at 100 pounds, constitute a strong, long-lasting system that stresses affordability. Heavy-gauge steel shell is designed to take the punishment of a clinical setting. Hidden, German-engineered 110 degree hinges give a distinct, clean look to the casework. Door/drawer fronts are available in 7 standard Ritter colors."

Call your IMCO Representative for a complete listing of options and specifications for all Midmark and Ritter Casework.

Cart for any application

Harloff Economy Treatment Cart

Treatment Carts store common "treatments" such as topical ointments; eye, ear, nose and throat supplies; wound care supplies; and other bulkier nursing supplies, including surgical apparel, masks, dressing disposal bags and blankets. They are mobile, agile and can be configured to meet the needs of just about any facility.

Three Drawer Economy Treatment Cart

3026-ETC-5

Five Drawer Economy Treatment Cart

Harloff Pediatric Emergency Cart

Pediatric emergencies have clinical requirements that are different from adult emergencies. Since children vary in size, and clinicians don't receive enough opportunities to get in depth experience across all these size ranges, Harloff's pediatric emergency carts store the supplies to bridge this gap. After the child is measured, the right sized equipment is selected from the appropriate drawers, where each drawer features its own breakaway lock which ensures immediate access to critical supplies. This drawer configuration utilizes proven clinical methodology and decreases equipment inventory
