

Burdick TM55 and TM65 Treadmills

Digitally controlled

- Fewer moving parts reduces wear and tear
- Controlled “soft start” for patient safety
- Accurate speed and grade, regardless of weight
- Quiet operation
- Integrated into Burdick Quest® Exercise Stress System

1073-TM55LXXRB2 TM55, 120V
1073-TM65LEXRBE TM65, 120V

Burdick Quest® Exercise Stress System

- Performs both resting and 12-lead ECGs and stress tests
- Accurate ECG data acquired at the patient, eliminating non-cardiac electrical noise
- Flexible programming, you choose the protocol
- Full range of report formats
- Uses TM55 or TM65 treadmills

Mediaid Palco 100 Series Mini Pulse Oximeters

The series 100 can be used with either the integral sensor or with the cable adapter to allow wide variety of adult or pediatric sensors.

Model 100

It is a basic pocket size, spot checking pulse oximeter weighing only 3.4 OZ and gives approximately 1200 readings for one AA battery.

Model 130

It is the same size as the M100 and it has memory.

It operates in three modes:

- 1- Retains 30 minutes of data for single patient, ideal for treadmill.
- 2- Can capture data from up to 20 different patients tagging each patients results with time and date.

- 3- Expanded data for sleep screening for 10.5 hours.
