

Boekel Microplate Incubator

The Boekel Microplate Incubator provides a reliable, cost effective way to incubate culture kits, microplates, petri dishes, and test tubes. It yields the most efficient use of space and is the least expensive incubator available. The heating element is located behind a panel in the back of the incubator, providing uniform heat, excellent utilization of space and eliminates the risk of scorching samples placed on the chamber floor. The incubator has an attractive smoked acrylic plastic door, a gray Kydex® outer body and a sturdy aluminum interior that makes clean up a breeze. Comes supplied with flat plastic Digitemp® thermometer attached to the interior floor.

- 0878-260700 Microplate Incubator, 7-3/4" W x 6-1/2" D x 6-1/4" H
- 0878-3135400V Mini-Rack for 13 mm Test Tubes, 54 Place
- 0878-3163500V Mini-Rack for 16 mm Test Tubes, 35 Place
- 0878-3202400V Mini-Rack for 20 mm Test Tubes, 24 Place

Boekel 132000 Incubator

The need for an inexpensive, roomy, and feature loaded incubator has made this one of our most popular models. Its large capacity can handle all of the incubator requirements of the busiest physician's office, while the attractive styling, excellent performance and unbeatable price make it welcome in any lab. The Boekel Incubator Model 132000 has a see-through acrylic door, magnetic door latch, pilot light and On/Off switch. It is supplied with a spirit filled thermometer, an integral bottom shelf, plus an adjustable shelf.

- 0878-132000 Incubator, w/See-Through Door, Interior: 12" D x 10-1/2" H x 11-1/2" W

Lab-Line Imperial III Standard Incubators

These incubators combine the advantages of radiant warm wall heat with the convenience of LED temperature display LED continuously displays chamber temperature. All controls and displays are at eye level. Tempered glass inner door allows visual inspection of samples without affecting chamber environment.

- 3776-LLI302 Imperial III, 2.6 cu. ft., 2 shelves
- 3776-LLI305 Imperial III, 5.2 cu. ft., 3 shelves
- 3776-LLI310 Imperial III, 11.2 cu. ft., 6 shelves

Lab-Line L-C Incubators

These general laboratory incubators utilize radiant warm wall heating to maximize temperature uniformity. The hydraulic thermostat responds quickly to temperature changes, and a pilot light indicates when the unit is in operation. You can remove the perforated aluminum shelves easily for cleaning. Three-wire line cord with plug is included.

- 3776-LLI203 L-C Incubator, 1.3 cu. ft., 2 shelves
- 3776-LLI403 L-C Incubator, 5.1 cu. ft., 2 shelves
